You can fabricate another one if you want; however, R9 should be shipping the ones that they were using back on Friday. I can send you another VIPER 2241 when I get the ones back R09. ERT EDISON does not have any VIPER 2241s. I don't know about the OSC equipment room.

Ok. Thanks.

Just so I am clear....ERT East (not necessarily OSC Equipment Room in Edison) does not have Viperized Ludlum 2241 units. Because I thought in the OSC equipment room we do have Viper Links associated with a Ludlum 2241 (2x2 NaI probe and not 3x3).

More importantly.....the links that were sent from ERT East are Ludlum 2241 compatible? We will note that even though they came from Edison, we will send back to Erlanger.

Lastly, we did not receive the PVC NaI probe cover that we were given when we conducted the ATV Operations at the Holy Trinity Site. I assume they went to Region 09? If so, we can fabricate a new one for this unit.

Thanks

That is correct, but you can send it all back to me when you are done. ERT EDISON doesn't have any 2241s that have been converted to VIPER.

Hi Dave:

We received the one (1) Ludlum 2241 3 *3 case and it is now at the site. So just to clarify...the Viper links that went with this unit previously went to Region 09 and that is the reason ERT Edison sent us two links. One extra for backup. Correct?

Thanks

I shipped the 2241 to you yesterday, but it didn't get picked up until today, and SERAS shipped you the VIPER Links. R9 has all of my 2241 VIPER Links now.

Dave

Hi Dave:

I got shipping information for
Ludlum 2241 3x3 cables from SERAS today. Does that mean the unit is on its way?

Thanks

Regards,

Eric
